

SUPERIOR SURFACE & AIR DISINFECTANT, FUNGICIDE, VIRUCIDE, SPORACIDE AND DEODORIZER

- NO-WAIT INSTANT MICROBICIDE, VIRUCIDE, FUNGICIDE & SPORACIDE.
- SUITABLE FOR ALL SPACES & SURFACES, INCLUDING WOOD, MARBLE & STAINLESS STEEL.
- NON-RESIDUAL & DOES NOT NEED CLEANING.
- PH NEUTRAL, NON-TOXIC & ENVIRONMENTALLY SUPERIOR TO ALTERNATIVE TOXIC CHEMICALS.
- PREVENTS & ELIMINATES INFECTION IN QUARANTINE SCENARIO OR AMONG TRAVELLERS.
- BIOLOGICAL INGREDIENTS WITH NO DYES, ALCOHOL AND ALDEHYDES. OR NO EVACUATION NEEDED.

AQOZALYTE
NATURAL DISINFECTANT

OFFERING PREMIUM HIGH GRADE DISINFECTION & DE-ODORIZATION ON ALL SURFACES, WITH NO WAITING TIME OR RINSE NEEDED.

Providing highest standard in environmental care, AQOZALYTE is a no-rinse multi-surface general disinfectant & deodorizer that is pH neutral, Non-toxic & environmentally superior to alternative toxic chemicals.

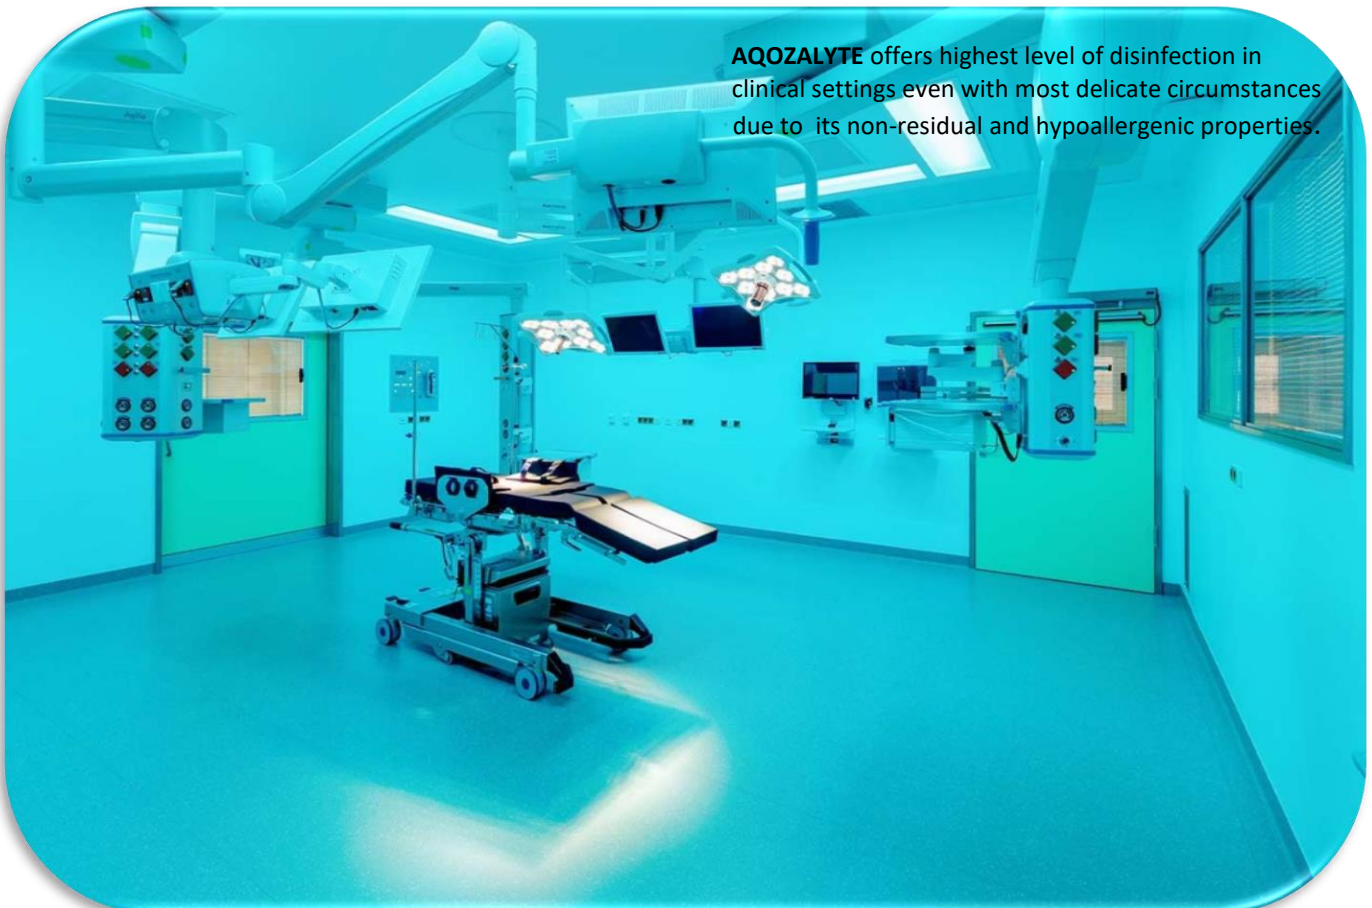

As with all of our products, **AQOZALYTE** combines environmental safety with high-grade efficacy.

AQOZALYTE provides complete protection against bacteria, and both enveloped & non-enveloped viruses, bridging the gap with most common surface disinfectants.

AQOZALYTE offers additional fungicidal properties and works on preventing & eliminating mold growth on all treated surfaces, making it ideal for porous surfaces like wood and safe to use on specialty surfaces like marble. No stains, smells, residue or waiting time needed.

AQOZALYTE goes beyond all common safety measures to offer a human identical product, with the enzyme MPO in the body producing an identical by-product of our solution and being recognized as biological and safe by healthy cells in the body.

AQOZALYTE kills all germs indiscriminately, with no promotion of resistance, making it ideal for healthcare facilities to prevent and destroy superbug formations.

- Kills bacteria, viruses, fungi and spores
- Non-toxic disinfectant and deodorizer
- Free of alcohol, aldehydes, dyes & scents, non-staining
- Hypoallergenic & non-irritant
- pH neutral
- Cost and time effective with no evacuation necessary & immediate disinfection

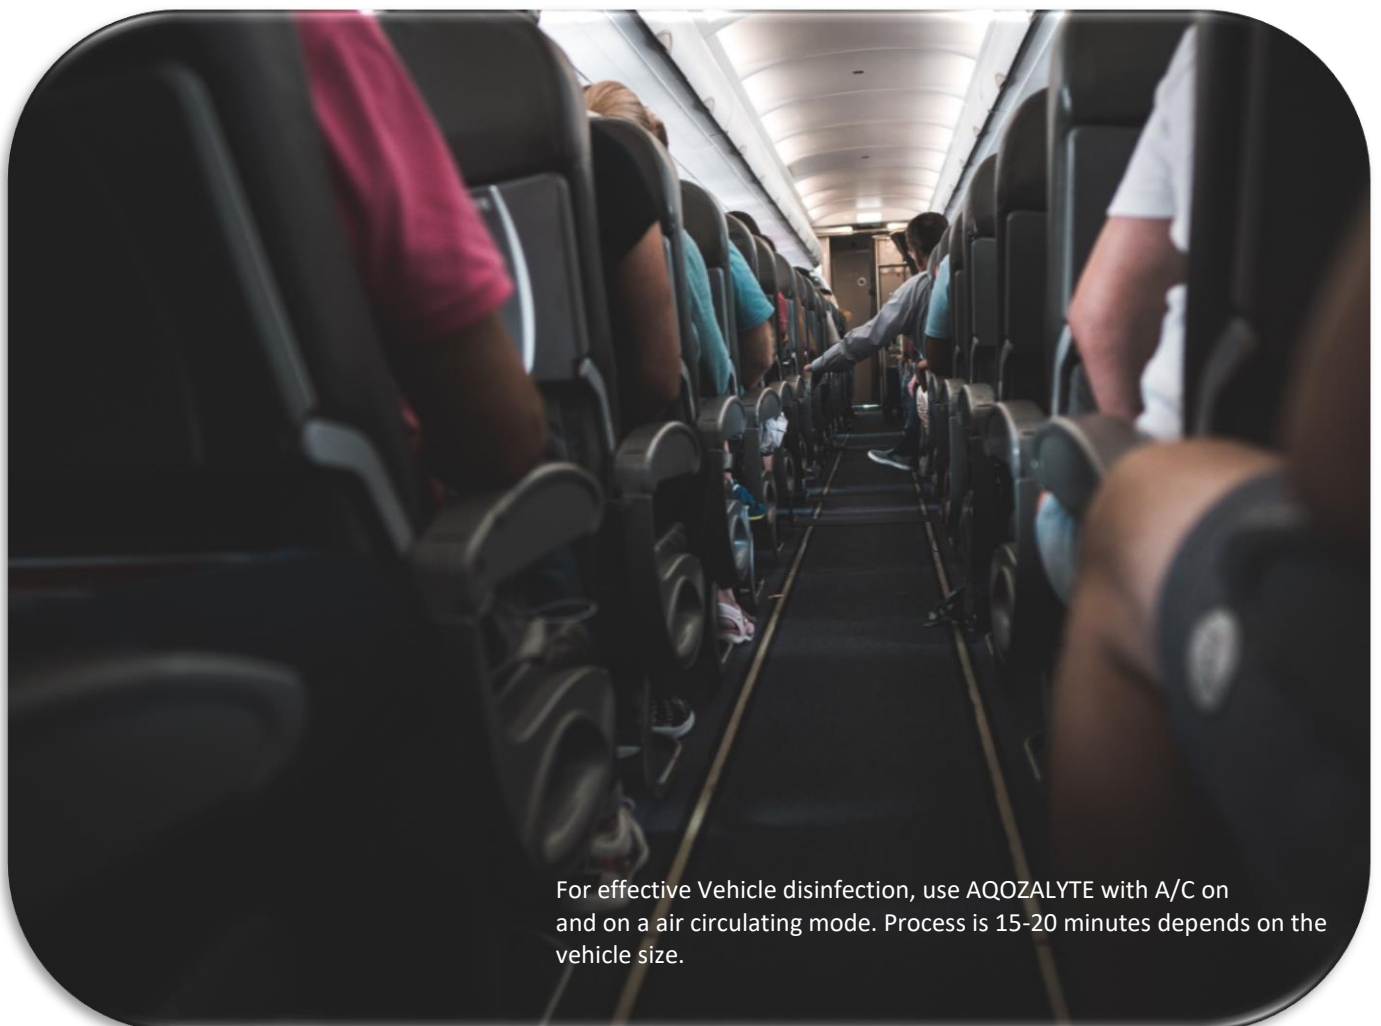

Area of Applications:

- Surface & Air Disinfection & Deodorization
- Residential & Industrial Buildings
- Aviation
- Transportation vehicles
- Health facilities
- Hotels & Resorts
- Sports & Recreational Facilities

APPLICATION & DILUTION FOR SURFACE & ENVIRONMENTAL HYGIENE:

- For all surface disinfection purposes after cleaning, spray ready to use **AQOZALYTE** in average / low risk environments and apply onto all surfaces. Leave for 5 minutes to ensure complete disinfection, wipe clean. No rinse needed.
- We highly suggest that biosecurity procedures per healthcare facility include daily check lists, for example items of higher contamination to check off daily in personal patient environments include: Bed rails and linens, governed tables, pressure cuffs, IV pumps, nurse call buttons, and urinary collection bags..
- Reliable in outbreaks if used according to hospital outbreak & infection control regulations in surface and disinfection soaks.
- **AQOZALYTE** can be fogged to cover larger areas for surface disinfection without the need to evacuate patients or equipment. Fogging is an essential component of critical outbreak control. and we highly recommend the use of air disinfection additionally as a critical complementary component to surface disinfection.
- For full ambulance transport interior disinfection & any transport vehicles, **AQOZALYTE** can offer fast, full disinfection via fogging; ensuring safety & hygiene without delaying vehicle or aircraft use. **AQOZALYTE** can additionally supplement as an air disinfectant.

For effective Vehicle disinfection, use AQOZALYTE with A/C on and on a air circulating mode. Process is 15-20 minutes depends on the vehicle size.

Aqozalyte Composition:

Superoxide Hypochlorous Acid Solution 0.01 – 0.04%

Aqozalyte Solutions:

Recommended Application Equipment:

Modern ULV Foggers

Conventional Foggers

Pressure Spayers

AQOZA Technologies Pvt Ltd, 30/1596 A1, Vytilla, Cochin, Kerala, India.
